

Attn: Kathleen Wynne - Premier of Ontario

Ramona Afante - Senior Project Evaluator

It is with a heavy heart, that I am writing this letter, as I am concerned you may be causing the death of a community.

Our home, "Prince Edward County" is made up of good people, fantastic wild life and birds, with unique countryside, different from other areas of Ontario. I am very proud to tell anyone where I live and what Prince Edward County has to offer.

Wind turbines do not belong in Prince Edward County!

In several studies, it has been proven that our birds, their migration patterns and other wildlife will suffer. Our property values will decrease and some people will suffer personal health issues from the noise , vibration and shadow flicker caused by the turbines.

Not only are the turbines an eyesore, due to their size and flashing red lights , they will detract from the natural beauty and heritage sites that make our community a special place to live and to visit.

Prince Edward County relies heavily on the annual tourist trade to maintain a thriving community.

I believe the turbines will detract from the natural beauty of Prince Edward County and our cultural heritage.

Please do not proceed with any wind turbines in Prince Edward County !

Thank you for taking the time to read my concerns.

Sincerely,

Bryan and Kate Muir, APPEC Members
